Year 4 Autumn 1 Online Safety

Searching online

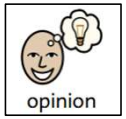

Different search engines give different results.
The first result is not always the most accurate.
Some search engines are adverts.

Remember:

- Not everything online is true
- Check more than one source
- Think before you click.
- Be kind and respectful
- Balance screen time with other activities.

A **fact** can be checked and proved

An **opinion** is what someone thinks or feels

A **belief** is something a person accepts as true, even if others disagree

If you see something unkind or something that makes you feel worried or scared – tell a trusted adult.

Key vocabulary

search results	advantage
accuracy	bot
advertisement	risk
influencer	distraction
recommendation	hashtag
belief	copyright
opinion	fair use
fact	misinformation
reliability	digital footprint

Adverts may use bright colours, discounts or famous people to make you want to buy things. Not everything online gives us information – adverts try to sell us things.

REMEMBER:

Technology can be used to help us learn, play and have communicate.

Too much screen time can be bad for us. Try to take breaks and enjoy offline activities.

Computer Bots

A bot is a computer program that can do jobs automatically. Sometimes bots are helpful, but they are not real people.
